EDUCATION

University of Houston, Houston, TX

May 2026

Bachelor of Science in Computer Science

GPA: 3.81/4.00

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Database Systems, Data Science

Honors: Dean's Distinguished Scholars List (x2); Dean's List (x2)

EXPERIENCE

Assistant Property Manager / Software Developer

Aug. 2023 – Present

Oakville Management LLC

Houston, TX

- Oversee day-to-day operations across multiple rental properties, ensuring compliance with company standards and tenant satisfaction.
- Develop responsive property listing web pages using HTML, JavaScript, and Tailwind CSS, modernizing the company's online presence.
- Build internal full-stack tools for hotel operations, including a booking app and registration data platform.
- Collaborate with the executive team to identify workflow bottlenecks and deploy software-driven solutions for document tracking and reporting.

Food and Consumables Team Associate

Sep. 2021 – May 2024

Walmart

League City, TX

- Delivered excellent customer service by assisting customers with locating products and resolving inquiries.
- Trained and mentored new associates, improving onboarding efficiency and team performance.

PROJECTS

Airline Ticketing System | *React, ASP.NET, MySQL*

Jan. 2026 – Apr. 2026

- Led a team of five developers to build a full-stack airline reservation system supporting flight search, booking, cancellations, and payments using React, ASP.NET, and MySQL.
- Built RESTful APIs for booking workflows, including seat assignment, standby logic, and ticket management.
- Implemented role-based access control for passengers, employees, and administrators.
- Mentored team members on full-stack development practices, improving code quality and feature delivery.

Cloud Storage Platform | *Next.js, React, Tailwind, Node.js, Appwrite*

Oct. 2025 – Present

- Engineered a self-hosted Google Drive-style platform with secure authentication, file upload/download and sharing capabilities using Appwrite as a backend + database service.
- Designed a responsive layout using Tailwind CSS and React for seamless navigation and drag-and-drop uploads.
- Optimized upload and retrieval performance with asynchronous requests and efficient caching.
- Developed a RESTful service layer for file/folder CRUD operations, storage quota enforcement, and recursive folder navigation.

Volunteer Management Platform | *React, Firebase, Express, MySQL*

Aug. 2025 – Nov. 2025

- Collaborated in a team of 4 to engineer a scalable React + Express + MySQL web platform supporting volunteer registration, event scheduling, and automated matching.
- Followed Agile development principles, utilizing Git to track issues, assign tasks and deliver incremental features.
- Implemented RESTful APIs to manage volunteer profiles, event creation, and historical participation data.
- Deployed the application on Azure and Vercel, enabling reliable performance and streamlined CI/CD workflows.

TECHNICAL SKILLS

Languages: C++, C#, Python, SQL, HTML, CSS, JavaScript, Java

Frameworks: React, Next.js, Tailwind CSS, Node.js, Express, ASP.NET Core, MySQL

Developer Tools: VS Code, Firebase, Appwrite, Azure, Git, Docker, Linux, JetBrains IDEs, Figma, Tableau

INVOLVEMENT

CougarCS – Member

Sep. 2024 – May 2026

Coog Esports – Member

Sep. 2024 – Dec. 2024
